Important questions to consider when choosing your clinic supplies partner

- What percentage of orders were delivered on time and in full last month?
- Can they provide you with a one stop shop?
- Do they keep you updated with new products to help improve patient outcomes?
- Do they offer free samples and demos?
- Do they offer free returns?
- Do they provide an interactive website for you to manage your account and order history?
- Can you speak to them on the phone?
- Do they offer next day delivery to save bulk storage at your clinic?

Astar PhysioGo Lite Laser

Treatment with laser radiation is a safe method of physical therapy that causes regenerative processes in tissues. The treatments are absolutely painless, which is why they can be used for both chronic and subacute and acute conditions.

PhysioGo.Lite Laser is the latest low level laser therapy device in the offer of ASTAR. Its unique design and applied protection concepts ensure patient safety during therapy. The compact size of the laser makes it an ideal device for physiotherapy centres and for home healthcare environmental therapy.

LEASING

What is equipment finance leasing?

Finance leasing is the most popular way for UK clinics to spread the cost of acquiring new equipment. It is a great way for businesses to ensure they get the correct equipment as opposed to a cheaper inferior product.

What are the benefits of equipment leasing?

- 100% Tax deductible - All rentals can be offset against company profit.
- Immediate purchase of equipment - acquiring the equipment when needed.
- Keep Capital - Which can be saved for other profitable purposes.
- Stay up to date - The immediate gain of having the very latest technology
- Small Outlay - Minimal down payment.
- VAT - Is paid each month on the rental therefore effectively deferred.
- Plan budgets - Payments are fixed you know when & how much to pay.
- Get the equipment you need when you need it - not when you can afford it.

*Subject to a successful credit application
